

COMUNICAT

din data de 02.02.2010

Stimati Colegi,

Va rugam sa analizati mesajul anexat prin care Organizatia Mondiala a Sanatatii
–WHO, solicita contra cost, in baza unui contract, serviciile unor vorbitori de limba
franceza specializati in Inginerie Sanitara si Protectia Apei pentru a
lucra in Haiti pentru o perioada de minimum 3 luni.

In cazul in care gasiti persoane interesate va rugam sa va adresati direct la
urmatoarele persoane de contact:

Compartmentul comunicare ARA

This is a call for a French speaking Water Sanitation generalist to urgently (before 7th February) take up at least 3 months service, preferably longer, with the WHO in Haiti. The task will be to ensure that the water and sanitation activities are implemented with a focus on WatSan in health care settings, and also on water quality monitoring with the WASH cluster lead by the national WatSan institution supported by UNICEF. Experience in low income countries and emergency & reconstruction situations would be of an advantage.

If you or some one who you know speaks French and is a WatSan generalist, we would need your reply as soon as possible to forward to WHO in Haiti. Please send us a CV of a person suitable and available, and when the approximate starting date of that person can be. Please respond urgently to Yves Chartier chartier@who.int and Dominique Maison, maisond@who.int.

Please see below detailed description:

Urgent request for a French speaking WatSan generalist from WHO for a minimum 3 months contract (paid by WHO) – deadline 7th February

Responsibility will be to ensure that the water and sanitation activities are implemented with a focus on WatSan in health care settings, and also on water quality monitoring with the WASH cluster. (Posted 28th Jan 2010)

Description of the type of person needed

- * The person needs to be a WatSan generalist, and not a specialist (high) technical
- * Experiences in low income countries is very desirable
- * A knowledge of WHO would be a best, but the person can be briefed while arriving in Haiti

Description of the type of work requested

- * The person will work as a water and sanitation engineer
- * Responsibility will be to ensure that the water and sanitation activities are implemented with a focus on WatSan in health care settings (lead cluster is WHO for health) and also on water quality monitoring with the WASH cluster lead by the WatSan national institution with support from UNICEF

- * The person will be under WHO contract and paid by WHO
- * There will be a hand over on site
- * The person will work with a WHO Haiti environmental health technician. She is full time coordinating the emergency response but will be a strong support to the staff coming. She knows the work that is needed, knows the right people to talk to for the task, and is knowledgeable about WHO working procedures and structure.

Proposed activities for 3 months

Work area 1: Health care settings

Activity 1 - Water

Activity 2 - Hygiene

Activity 3 - Sanitation

Activity 4 - Health care waste

Activity 5 - Vector control

Expected result: Environmentally safe health care settings allowing access to safe water, sanitation and hygiene to prevent and control the transmission of disease.
